① $32 : 20 = 8 : \square$

Diagram showing the process of simplifying the ratio $32 : 20$ by dividing both terms by 4. An arrow labeled $\div 4$ points from 32 to 8, and another arrow labeled $\div 4$ points from 20 to a square box.

② $35 : 45 = \square : 9$

Diagram showing the process of simplifying the ratio $35 : 45$ by dividing both terms by 5. An arrow labeled $\div 5$ points from 35 to a square box, and another arrow labeled $\div 5$ points from 45 to 9.

③ $18 : 24 = 3 : \square$

Diagram showing the process of simplifying the ratio $18 : 24$ by dividing both terms by 6. An arrow labeled $\div 6$ points from 18 to 3, and another arrow labeled $\div 6$ points from 24 to a square box.

④ $54 : 63 = \square : 7$

Diagram showing the process of simplifying the ratio $54 : 63$ by dividing both terms by 9. An arrow labeled $\div 9$ points from 54 to a square box, and another arrow labeled $\div 9$ points from 63 to 7.

・ 等しい比を作りましょう。

① $32 : 20 = 8 : 5$

Diagram showing the simplification of the ratio 32:20 to 8:5. A horizontal line above the ratio is labeled $\div 4$. An arrow points from this line to the number 8. A vertical line goes down from 8, then a horizontal line to the right, then a vertical line up to the number 5. A horizontal line below the ratio is labeled $\div 4$. An arrow points from this line to the number 5.

② $35 : 45 = 7 : 9$

Diagram showing the simplification of the ratio 35:45 to 7:9. A horizontal line above the ratio is labeled $\div 5$. An arrow points from this line to the number 7. A vertical line goes down from 7, then a horizontal line to the right, then a vertical line up to the number 9. A horizontal line below the ratio is labeled $\div 5$. An arrow points from this line to the number 9.

③ $18 : 24 = 3 : 4$

Diagram showing the simplification of the ratio 18:24 to 3:4. A horizontal line above the ratio is labeled $\div 6$. An arrow points from this line to the number 3. A vertical line goes down from 3, then a horizontal line to the right, then a vertical line up to the number 4. A horizontal line below the ratio is labeled $\div 6$. An arrow points from this line to the number 4.

④ $54 : 63 = 6 : 7$

Diagram showing the simplification of the ratio 54:63 to 6:7. A horizontal line above the ratio is labeled $\div 9$. An arrow points from this line to the number 6. A vertical line goes down from 6, then a horizontal line to the right, then a vertical line up to the number 7. A horizontal line below the ratio is labeled $\div 9$. An arrow points from this line to the number 7.
