

# 比4

● かけ算で  
等しい比を作ろう (整数)

日にち： 月 日

名まえ \_\_\_\_\_

・ 等しい比を作りましょう。(うすい字はなぞりましょう。)

①  $2 : 5 = 4 : 10$

Diagram showing the process of creating an equivalent ratio. An arrow labeled "×2" points from 2 to 4. Another arrow labeled "×2" points from 5 to 10. The number 10 is enclosed in a box.

②  $1 : 8 = \square : 64$

Diagram showing the process of creating an equivalent ratio. An arrow labeled "×8" points from 8 to 64. The empty box is enclosed in a box.

③  $7 : 3 = 63 : \square$

The empty box is enclosed in a box.

④  $4 : 9 = \square : 72$

The empty box is enclosed in a box.

・ 等しい比を作りましょう。(うすい字はなぞりましょう。)

①  $2 : 5 = 4 : 10$

Diagram showing the transformation from  $2 : 5$  to  $4 : 10$ . An arrow labeled  $\times 2$  points from 2 to 4. Another arrow labeled  $\times 2$  points from 5 to 10. The number 10 is enclosed in a box.

②  $1 : 8 = 8 : 64$

Diagram showing the transformation from  $1 : 8$  to  $8 : 64$ . An arrow labeled  $\times 8$  points from 1 to 8. Another arrow labeled  $\times 8$  points from 8 to 64. The number 8 is enclosed in a box.

③  $7 : 3 = 63 : 27$

Diagram showing the transformation from  $7 : 3$  to  $63 : 27$ . An arrow labeled  $\times 9$  points from 7 to 63. Another arrow labeled  $\times 9$  points from 3 to 27. The number 27 is enclosed in a box.

④  $4 : 9 = 32 : 72$

Diagram showing the transformation from  $4 : 9$  to  $32 : 72$ . An arrow labeled  $\times 8$  points from 4 to 32. Another arrow labeled  $\times 8$  points from 9 to 72. The number 32 is enclosed in a box.
