$$\textcircled{1} \quad 10 : 35 = 2 : \square$$

Diagram showing the simplification process: $10 \div 5 = 2$ and $35 \div 5 = 7$. Arrows indicate the division of both terms of the ratio by 5.

$$\textcircled{2} \quad 12 : 3 = \square : 1$$

$$\textcircled{3} \quad 24 : 18 = 4 : \square$$

$$\textcircled{4} \quad 40 : 24 = \square : 3$$

名まえ _____

・ 等しい比を作りましょう。

① $10 : 35 = 2 : 7$

Diagram showing the simplification of the ratio 10:35 to 2:7. A horizontal line above the numbers 10 and 35 is labeled $\div 5$. An arrow points from this line down to the number 2. A horizontal line below the numbers 35 and 7 is labeled $\div 5$. An arrow points from this line up to the number 7. The number 7 is enclosed in a rounded square box.

② $12 : 3 = 4 : 1$

Diagram showing the simplification of the ratio 12:3 to 4:1. A horizontal line above the numbers 12 and 3 is labeled $\div 3$. An arrow points from this line down to the number 4. A horizontal line below the numbers 3 and 1 is labeled $\div 3$. An arrow points from this line up to the number 1. The number 4 is enclosed in a rounded square box.

③ $24 : 18 = 4 : 3$

Diagram showing the simplification of the ratio 24:18 to 4:3. A horizontal line above the numbers 24 and 18 is labeled $\div 6$. An arrow points from this line down to the number 4. A horizontal line below the numbers 18 and 3 is labeled $\div 6$. An arrow points from this line up to the number 3. The number 3 is enclosed in a rounded square box.

④ $40 : 24 = 5 : 3$

Diagram showing the simplification of the ratio 40:24 to 5:3. A horizontal line above the numbers 40 and 24 is labeled $\div 8$. An arrow points from this line down to the number 5. A horizontal line below the numbers 24 and 3 is labeled $\div 8$. An arrow points from this line up to the number 3. The number 5 is enclosed in a rounded square box.
