

## 分数のかけ算③

● 分数と整数の積（積が整数）

日にち：            月            日

名まえ

---

・ 次の計算をしましょう。

$$\textcircled{1} \quad \frac{3}{8} \times 56 =$$

$$\textcircled{2} \quad \frac{7}{4} \times 36 =$$

$$\textcircled{3} \quad \frac{8}{5} \times 35 =$$

$$\textcircled{4} \quad \frac{9}{7} \times 28 =$$

$$\textcircled{5} \quad \frac{3}{25} \times 100 =$$

$$\textcircled{6} \quad \frac{5}{6} \times 18 =$$

$$\textcircled{7} \quad \frac{2}{7} \times 7 =$$

## 分数のかけ算③

● 分数と整数の積 (積が整数)

日にち：            月            日

名まえ

---

・ 次の計算をしましょう。

$$\textcircled{1} \quad \frac{3}{8} \times 56 = \frac{3 \times \cancel{56}^7}{\cancel{8}_1} = 3 \times 7 = 21$$

$$\textcircled{2} \quad \frac{7}{4} \times 36 = \frac{7 \times \cancel{36}^9}{\cancel{4}_1} = 7 \times 9 = 63$$

$$\textcircled{3} \quad \frac{8}{5} \times 35 = \frac{8 \times \cancel{35}^7}{\cancel{5}_1} = 8 \times 7 = 56$$

$$\textcircled{4} \quad \frac{9}{7} \times 28 = \frac{9 \times \cancel{28}^4}{\cancel{7}_1} = 9 \times 4 = 36$$

$$\textcircled{5} \quad \frac{3}{25} \times 100 = \frac{3 \times \cancel{100}^4}{\cancel{25}_1} = 3 \times 4 = 12$$

$$\textcircled{6} \quad \frac{5}{6} \times 18 = \frac{5 \times \cancel{18}^3}{\cancel{6}_1} = 5 \times 3 = 15$$

$$\textcircled{7} \quad \frac{2}{7} \times 7 = \frac{2 \times \cancel{7}^1}{\cancel{7}_1} = 2 \times 1 = 2$$
