

・ 次の計算をなさい。

①  $(-2.2) - (+3.4)$

\_\_\_\_\_

②  $(+4.8) \div (-0.8)$

\_\_\_\_\_

③  $(+2.5) \times (-0.8)$

\_\_\_\_\_

④  $(-7) \div (-1.4)$

\_\_\_\_\_

⑤  $(-0.6) \times (-1.3)$

\_\_\_\_\_

⑥  $-4.1 + 2.6 - 1.4$

\_\_\_\_\_

⑦  $(-0.1) \div 0.5$

\_\_\_\_\_

⑧  $3.3 - 4.6 - (+0.5)$

\_\_\_\_\_

・ 次の計算をなさい。

$$\textcircled{1} (-2.2) - (+3.4)$$

$$= (-2.2) + (-3.4)$$

$$= -2.2 - 3.4$$

$$= -5.6 \qquad \underline{\qquad -5.6 \qquad}$$

$$\textcircled{2} (+4.8) \div (-0.8)$$

$$= -(4.8 \div 0.8)$$

$$= -6$$

$$\underline{\qquad -6 \qquad}$$

$$\textcircled{3} (+2.5) \times (-0.8)$$

$$= -(2.5 \times 0.8)$$

$$= -2$$

$$\underline{\qquad -2 \qquad}$$

$$\textcircled{4} (-7) \div (-1.4)$$

$$= +(7 \div 1.4)$$

$$= 5$$

$$\underline{\qquad 5 \qquad}$$

$$\textcircled{5} (-0.6) \times (-1.3)$$

$$= +(0.6 \times 1.3)$$

$$= 0.78$$

$$\underline{\qquad 0.78 \qquad}$$

$$\textcircled{6} -4.1 + 2.6 - 1.4$$

$$= -4.1 - 1.4 + 2.6$$

$$= -5.5 + 2.6$$

$$= -2.9$$

$$\underline{\qquad -2.9 \qquad}$$

$$\textcircled{7} (-0.1) \div 0.5$$

$$= -(0.1 \div 0.5)$$

$$= -0.2$$

$$\underline{\qquad -0.2 \qquad}$$

$$\textcircled{8} 3.3 - 4.6 - (+0.5)$$

$$= 3.3 - 4.6 - 0.5$$

$$= 3.3 - 5.1$$

$$= -1.8$$

$$\underline{\qquad -1.8 \qquad}$$
