

・ 次の計算をなさい。

① $-3.7 - (-4.6)$

② $-6 + 16 - 8$

③ $0.4 - 1.3 - (+5.1)$

④ $-8 - (-12)$

⑤ $7.1 - 2.7 + 0.8$

⑥ $16 - (+9) + (-12)$

・ 次の計算をなさい。

$$\textcircled{1} -3.7 - (-4.6)$$

$$= -3.7 + (+4.6)$$

$$= -3.7 + 4.6$$

$$= 0.9 \qquad \underline{0.9}$$

$$\textcircled{2} -6 + 16 - 8$$

$$= -6 - 8 + 16$$

$$= -14 + 16$$

$$= 2 \qquad \underline{2}$$

$$\textcircled{3} 0.4 - 1.3 - (+5.1)$$

$$= 0.4 - 1.3 + (-5.1)$$

$$= 0.4 - 1.3 - 5.1$$

$$= 0.4 - 6.4$$

$$= -6 \qquad \underline{-6}$$

$$\textcircled{4} -8 - (-12)$$

$$= -8 + (+12)$$

$$= -8 + 12$$

$$= 4 \qquad \underline{4}$$

$$\textcircled{5} 7.1 - 2.7 + 0.8$$

$$= 7.1 + 0.8 - 2.7$$

$$= 7.9 - 2.7$$

$$= 5.2 \qquad \underline{5.2}$$

$$\textcircled{6} 16 - (+9) + (-12)$$

$$= 16 + (-9) + (-12)$$

$$= 16 - 9 - 12$$

$$= 16 - 21$$

$$= -5 \qquad \underline{-5}$$
