

・ 次の計算をなさい。(各20点)

① $-2 + (-4) \times 3 - 1$

② $13 + (-5) \times 7$

③ $5 \times (-1)^3$

④ $(-42) \div 7 - (-2) \times 6$

⑤ $(-3^2) \div (-9)^2$

・ 次の計算をなさい。(各20点)

$$\textcircled{1} -2 + (-4) \times 3 - 1$$

$$= -2 - 12 - 1$$

$$= -15$$

$$\underline{\quad\quad\quad -15 \quad\quad\quad}$$

$$\textcircled{2} 13 + (-5) \times 7$$

$$= 13 - 35$$

$$= -22$$

$$\underline{\quad\quad\quad -22 \quad\quad\quad}$$

$$\textcircled{3} 5 \times (-1)^3$$

$$= 5 \times (-1)$$

$$= -5$$

$$\underline{\quad\quad\quad -5 \quad\quad\quad}$$

$$\textcircled{4} (-42) \div 7 - (-2) \times 6$$

$$= -6 - (-12)$$

$$= -6 + 12$$

$$= 6$$

$$\underline{\quad\quad\quad 6 \quad\quad\quad}$$

$$\textcircled{5} (-3^2) \div (-9)^2$$

$$= (-9) \div 81$$

$$= -\frac{9}{81}$$

$$= -\frac{1}{9}$$

$$\underline{\quad\quad\quad -\frac{1}{9} \quad\quad\quad}$$
